

FEATURE COMPARISON

# Mobile Meetings

## SmartMeet vs. Mobile Assistant

SmartMeet™ is our newest and most powerful app to manage meetings while on the go for iPhones and Android phones. Mobile Assistant is now only available and the primary app for BlackBerry.

We researched how meetings occur today and we've built a complete new application from the ground up. As you can see below, there are a lot of great new features available on SmartMeet.

	SmartMeet		Mobile Assistant
Leader Features	<i>iPhone</i>	<i>Android Phones</i>	<i>BlackBerry</i>
