

# SmartMeet™

A Clever App for Your Smart Device

Discover a new way to start and join meetings and enjoy a richer conferencing experience with SmartMeet – a mobile conferencing application for the enterprise.

Enhance your meetings with powerful features and functionality:

- Connect to your meetings and save mobile minutes using VoIP instead of Call Me or Dial-In.
- Access your complete list of designated local and international dial-in numbers.
- Integrate with SIRI on iPhones.
- Use the cutting-edge view of your meeting and participants with Active Talker indicator.
- Invite participants via SMS, email or Call Now within your meeting.

## Voice over IP (VoIP)

Use VoIP to talk and control your meetings if your network carrier does not support simultaneous talk and data or when you're travelling internationally and avoid high roaming charges. *\*Coming soon for Android\**.

## Chat

Add a new level of engagement between you and your participants with the in-meeting Chat feature.

## Password Protection and Provisioning

Increase meeting security by setting a required application password for all accounts, within your organisation, which can be set to expire periodically. To enable this feature please contact your dedicated Account Manager.

## Push Notifications

Receive push notifications when someone first enters your Waiting Room and again after five minutes of inactivity, as a reminder to start your meeting.

## Native Calendar Integration

See when you're free and can schedule a meeting by using the in-app calendar via your device's native calendar.

## Favourite Meeting Profiles

Store an unlimited amount of unique meeting profiles to your favourites for quick access – retrieve global dial-in numbers and connect with one tap.

## Participant and Waiting Room View

View participants in your meeting or waiting for your approval to join your meeting by easily navigating between the Participant and Waiting Room view tabs.

## Management and Control

Maintain total meeting control with in-app features – mute, unmute, rename, disconnect all or individual participants and more.
